

Join us on our revamped Gungame Deathmatch server, we have just added an excellent mix of new and classic maps for you!

With an enlarged map rotation and bots to keep you company (and get owned!) while you are alone on server, our server provides excellent reg and performance due to the Gungame plugin we use. Forget Gungame 5, when you play GG:SM you will notice why the shots reg better and the server "feels" more accurate.

Enjoy the frantic action and speed of Gungame Deathmatch with a careful selection of good maps and performance like no other!
