

## SERVER crash...

Posted by masteraviv13 - 17 Apr 2011 09:59

---

it might be that the server has been crashed now 5 minutes ago 🤔

Don't worry,

it seems to be fixde after 10 minutes! :O

my excuses for opening a no-needing topic xO

If a server has a downtime for more than 10 minutes then sure, make a post about it, but please tell us which server has gone down :p

Thanks for letting us know anyway =]

Wcs server crashes all the time it's kinda normal 😊  
but like Mr.Moo sayed if it's longer then 10 min then it's worth to make a post 😊

---

Yeah the WCS server is prone to crash every 1.5-3 hours.

It crashes due to the many weapon, race and map restrictions we have set on the server, they get confused or it fails to load at a decent speed and causes a crash. If you get the &quot;Lost connection&quot; in the top right corner, do what I do...

Wait till the timer is down to 15 seconds, open console and type &quot;retry&quot; it'll auto-connect you back to it.
