Just thought I would tell everybody that the WCS server seems to be running and older version of the game again, I can connect to all the other servers but the WCS server.

Substick 🤔

So do I 🤔  
I wish valve would warn us if they were going to do these updates.

I think this update has fucked the WCS server 🤔  
It comes online for 10 minutes then crashes for 10 minutes and keeps repeating that process. 🤔  
Stupid Valve update 🤔

Grr.

I wish they'd give players the option to have the update and/or create a fix for those using custom mods on Valve servers such as the CSS WCS.
