Hi Guys,

Just thought I'd check to make sure that you are aware once again that steam have done another update and the server needs fixing to the same version.

Right, should be sorted now.

Sorry for the hold-up, was busy studying so didn't notice it being down. Why o why does valve keep doing updates ? You don't even notice any ingame diff :s

Hi guys,

Just letting you know that the wcs server is down again, has been for 15mins ish now....

Alot of people have been experiencing problems with steam (myself included) where you constantly get kicked from a server with a message saying "a connection to the steam vac server could not be made";

Dont know if that has had anything to do with it....

Anyways! Over to you!

Wow im getting to be a regular in this section!

Ok.... Server problems allround...

1st. As stated in my previous post the wcs server is down....!👉

2nd. The GG DM server at the end of someone winning the game, the server crashes and reboots over and over on the same map.👉

3rd. The Surf DM server, noone can connect! just get stuck in the connecting loadup screen and hangs

there. 🍷

4th. The normal CSS server you guys have is also down, it does occasionally resurface in my fav's tab but its non responsive. 🙄

Havent tried your other servers but thought i'd let you know about these which seem to be the most popular. Looks like someone dropped a bomb on your terminal!

Hope you guys can get things easily sorted!

Thanks guys! 🙏
