

donating races not working!

Posted by Hypernuke - 06 Aug 2011 22:18

Hello, i donated yesterday. and i got the skins later that evening and the races next morning, but the thing is that its not working anymore. I've been told that some admins are gona check out whats wrong, but nothing have happend.

So i wonder when it will be fixed?

What do you mean by not working?

Not being able to select?

The race not doing anything?

Or just not even there?

I was talking to HyperNuke earlier, he said that it wasn't letting him select them, they were in the list but it said "ColaMan (Donator Race)" and didnt let him select it.. probably just missing permissions, i told mentos about it but he was AFK (no other admins online) so i told him to post here.

Thanks

Hiya,

This could possibly be due to Hypernuke not being the correct level required to use some of the donator races? In which case, one of a few things needs to happen.... he needs to be given amount of levels needed to be able to play "all" the donator races. Two he needs to play and lvl himself like a madd ass... or three the races lvl restrictions need to be altered for the donator races so that anyone else donating at a low level will instantly be able to play them.

Those are my thoughts anyhow! What do you think? 😊

Scathe

They shouldnt require any levels tbh 😊
If you give levels then others will donate because they know they get say 200 free levels and special races 😊

i gave him the permissions the other night , and ive looked at them now , and everything seems fine , so its either he needs levels which has to be looked into , or they are not working , hopefully pooky will be on later to have a look.

I fixed it for him and wiggly but it looks thats its not permanent. We should ask piggly wiggly if he still has the races, if he does i might know whats wrong. When i did it for piggly i gave him wcsadmin than took it away and safed admins. For hyper i just gave and removed them without saving, due to server restart this might have been resetted for him but not for wiggly.

edit: i gave them both wcsadmin without any rights, should work for now

edit2: piggly races work now without wcsadmin, so probably when hyper is online, i remove and safe the thing and everything should be ok 😊

been speaking to pooky just now , he says it might not work as theres a set number of levels before they work.

hes going to have a proper look later.
