Spectating glitch
Posted by awais1 - 14 Aug 2011 02:21

_____

Yeah i've recently been on the wcs server and i seem to be a player in spectator that can pick up and drop weapons, and also block people, and have been accused of hacking by certain people, meaning that if i go spec for a break ill be blocking people.

any suggestions on how to fix?

thanks for reading

_____

Noes 😟
Its my only way to get close to killing people 😟
What you need to do it go spec when you have died instead of going spec when you are alive 😟 and just float somewhere where you are not going to pick up weapons

_____

"That happens when using est_spawn (not sure about wcs spawn) on a player thats in spectator mode.

Like you have a race with 80% respawn after 5 seconds and that guy knows it and then switches spec before the 5 secs pass."
