Well,

We just played the map Anticamper1_shotenough

Lamepaininsane had the race, with ultimate, burrow in ground,

he used an m3, and was shooting from underground,

it was pretty unnoying, being shot while u can't know from where . :S

I said stop it, u might get a punishment for that, he ignored me, and said nothing back,

he kept doing it, and after third warning, chiffili, said it 2, he may not do that,

then he said ok,

but then the last rounds he kept doing it,

I hope there is something u guys can do about this.

greetz,

Deaglegameon

Either this, or record a demo, if you get a demo that can prove what you are saying is correct then we can deal with the matter after the incident, sorry for any upset this problem may have caused but unfortunately no admins were on the server at the time and were not informed of this behavior

Thankyou

(i am dealing with it like a professional right?)

This is why we need an admin on the server most of the day... I was on for about 3-4 hours this morning because a lot of people were being arseholes. We have a lot of dicks on the server right now so we need to have admins on the server, when I went off no1 was willing to go on or even check the server when I was away playing a different game which is when these happen 😊
so please can people just use some of their free time and go on the server, even if you are busy its not much to go on for like 2 mins check everything is okay or sit in spec and tell everyone that you will be watch or to message you if something bad is happening 😊
I appreciate a lot of people are busy but still
