HLstats question

Posted by ReactionZ - 23 Nov 2011 21:27

_____

Hi i finnaly found out how to get the clan in the rankings. But now the Co-leader

 he has the tag in the middle of his name. And he doesn't get in the list of the members of the clan in the ranking.

the only 2 members in the clan wich stands in the rankings are me and another friend.

Now my question is why does my co-leader doesn't get in the list ? =/

_____

As far as I know, the tag has to be at the start of your name..

_____

Or maybe at the end of the name?

cause my friend had it at the end of his name and i have it at the beginning of my name ?

_____

Yes it works at the end of your name as well 🙂

_____

The process to identify a tag by hlstatsx, starts from the beginning of the whole nick, if it finds something that may look like a tag, ie, it has characters like [{ - _ | , the script will get that until it finds a closing tag or a space.

So, the tags work best at the start of the nick.
