

Repeating GG DM server crash

Posted by FadeToBlack - 16 Jul 2010 07:12

I was playing aim_ag_texture_city early this morning mostly against bots but also a few rounds with other players on the GG DM server (81.19.209.200:27050). Every time I reached the nade level the sever crashed (connection interrupted and when I got back the map had restarted).

Noticed that yesterday at night with the server full, we are working on it.

Thanks for the input mate!
