

Warcraft Server Unable to changerace command

Posted by Dewy - 22 May 2011 08:12

At the time I am writing this Sunday 22nd 9:11am the server is kinda messed, no1 can changerace from that command and someone said there were only 12 races available

Just wondering if it could be fixed soon so i can stop blowing people up 😊

for people with ftp access: Traceback (most recent call last):

File "home/CSSwcs/hlds_l/orangebox/cstrike/addons/eventscripts/wcs/wcs.py", line 54, in getRaces

```
    return ConfigObj(self.races)
```

File

"home/CSSwcs/hlds_l/orangebox/cstrike/addons/eventscripts/_engines/python/Lib/site-packages/configobj.py", line 1283, in __init__

```
    raise error
```

ParseError: Parse error in value at line 3105.

wcs: Error: Unable to load races.ini, there was an error

wcs: Information: Loading the backup races...

FTP (File Transfer Protocol) it is used mostly to remotely access a server in which your using to host your counterstrike server, allowing you to add/remove things etc.

Thanks

INTERNET JARGON N00B ALERT!!!!!!!!!!!!!!!!!!!!111111111111111111

Yes, voodoo replied, to manage a CS:S server in linux (like ours) its needed sftp (to transfer things into the server) and ssh (to issue commands and edit configs).
