

Another Hacker Maybe? :o

Posted by Nemx - 18 Mar 2012 01:57

Hey guys as you can tell by my subject i wasnt to sure about this guy, i have made a recording again of him and i have got his steam id, i will send the video to substick i guess when he is online because i cant attach it -.-.

Personally i think he might be wall hacking and/or no recoil on his weapon

If your wondering why i had to play myself this was because he stopped at the start when i said 'brb going for a piss'

Obviously i could be wrong, but thats why i have put it here. Thanks.

I would like to know where the 'private' section of banning is i couldnt find one only one section for CSS thats why its posted here

I made this post very late at night when no one was online on steam, so i couldnt send this to anyone and didnt want to forget/not post thats the reason for it being on here.

and yes sorry if i offended you, but tbh at the time i believed and still do that there was a hack present.

Yeah only didn't post because it didn't seem like the correct place. just thought that CS:S would be more appropriate.
