

Updates for Deathmatch

Posted by DreamState - 29 Aug 2008 15:58

I've watched today the server with players on for most of the day so I figured it was time for some updates.

I am going to install mani and remove some of the meta-mod admin system.

With mani I can restrict weapons on certain maps (including AWP).

I have also added more maps to the end-of-map vote and removed some.

aim_afc_lasercage_v1.bsp

aim_ag_texture_city_advanced.bsp

de_dust2_mariostyle.bsp

de_godzilla.bsp

de_marijuan_bust.bsp

de_morningwood_v2.bsp

dm_dimensions.bsp

fy_dynamite.bsp

gg_simpsons_dust.bsp

de_dust2_mariostyle, in particular is worth a look 🍷

It was ok, just not we were used to, although mani seems to do some things I am stuck for a lot easier B) . The main reason I initially steered away is to keep the plugins on DM to a minimum. Hopefully, adding mani won't cause too much problem.

adding de_dust2_mariostyle and de_morningwood to source daytime config too.

de_morningwood is a really interesting map.

Mani should be sorted for the weekend.

i prefer mani as well - i know how to use it, and the other admin system confused me

ALOT 😊

ALOT 😊

Lool.

I'm not going to say a thing :dry: :blink: 😊

Will be done soon - maybe tonight 😊

4 / 5

I'm not going to say a thing :dry: :blink: 🙄

I'll finish it for you then - "not hard to confuse you mate 🙄
"

Something along those lines? 🙄

I've not a clue why you would think that.....

but yes. 🙄

Mani on.

Few issues remaining to sort - like end-of-map votes.

edit: sorted - just a few minor things now.
