---

Alrite... this is happening quite alot and is starting to get REALLY annoying... When the server goes on Awp\_Crazyjump2007 it tends to crash after about 20 seconds, it doesnt happen everytime the server goes on crazyjump but quite alot.. i love the map but hate that its crashing its soooooo annoying :/ Could you check the logs and see if you're able to see whats happening and fix if possible ?

Thnx 😊

Uh Oh... also on the subject of maps... De\_Dust2\_long i think its called... its SO DIRE!!!! The idea is good, i would like the map if the textures wernt so bad and un-playable and ppl can just go undermap and kill you. i'm thinking of re-texturing this map and making it the style of Aim\_Ag\_texture2... if you'd like me to do this and have it on the server just say so.. thnx 😊
