You have been banned for 30minutes for General Exploit of Game/Map/Server.

yeah mate

the general rule is:

if there is no buy menu on a map: you cant spawn guns. you can only use guns that are already on the map.

It seems you weren't aware of this, so it sounds like the person who banned you didnt follow the correct procedure. There should have been written warnings and a kick before the ban.

But at least you know the rules now 😊
