

Warcraft Server Admin

Posted by Roblackpool - 03 Dec 2010 10:32

Hi Guys

Following my "I'm back!" topic on the hello forum, thought i'd post on here and say hi.

Most of you should know me, I used to admin the Warcraft server, and helped out when the new races came out aaaages ago! I've started playing again and have been on the warcraft server most days for a few weeks. Sometimes there are issues with swearing, insults, bug abuses and some glitches which need ironing out.

Ontop of that there's a common issue with bots getting stuck in the last round of a map when not many people are online, this causes the map to stay on indefinitely, without players being allowed to join either team. If you will have me as admin I will be willing to retake my post and help clean up the TWK servers qnce more 😊

I used to be TwK - Rob, now TwK Roblackpool

I've got "server admin" on my signature, however the admin commands don't work. There are consistently issues on the wcs server as there are many abusable bugs. For example right now someone is using elites on a scoutknives server and is not responding to requests to change race. With admin he would be temp banned for 1 hr until the map changes, however there are currently no admins online..

Don't mean to be annoying however these guys are ruining the server for a lot of people and reducing the attraction of the server for everyone, including TWK members.

Recently as you know everyone had there levels reset etc etc. This was due to a new version of wcsmod (released 23/11/2010) which fixed alot of issues but is still in beta, thus there are things that dont work 🙄 the pooky and vogon where trying to fix what we could. However I think all 3 of us are quite busy atm so havent had the time to look at issues. So if either of you would like to help I'm sure I can spare a few and try to teach you the (very) little I know, or ill at least setup something so that we can report issues easier.

certainly I'm happy to help, I helped with the previous update by posting a list of bugs on the forum so I'm happy to do the same. Let me know what you want me to do that will help you guys out and I will 🙄

I also can help if u don't need much knowledge from programming or so for it. I got all races unlocked at the live server atm

Re: Warcraft Server Admin

Just re-read the above, it's not necessarily the bugs which are a problem, but people exploiting the mod, such as using guns on scoutknives etc.

I will be back on steam hopefully in the next week so in the mean time you can message me if there are any problems on the server.

admin required, inappropriate race for map, not allowed, not responding to requests

Its quite inefficient to post on the forums if you need an admin immediately, probably best to contact people through steam.
