Warcraft Server Admin

Posted by Roblackpool - 03 Dec 2010 10:32

_____

Hi Guys

Following my "I'm back!" topic on the hello forum, thought i'd post on here and say hi.

Most of you should know me, I used to admin the Warcraft server, and helped out when the new races came out aaaages ago! I've started playing again and have been on the warcraft server most days for a few weeks. Sometimes there are issues with swearing, insults, bug abuses and some glitches which need ironing out.

Ontop of that there's a common issue with bots getting stuck in the last round of a map when not many people are online, this causes the map to stay on indefinitely, without players being allowed to join either team. If you will have me as admin I will be willing to retake my post and help clean up the TWK servers once more)

I used to be TwK - Rob, now TwK Roblackpool

Its quite inefficient to post on the forums if you need an admin immediately, probably best to contact people through steam.

Is there any update on my application to have admin again? Cheater on the server right now:

74 "iSky *WOOPED^^" STEAM_0:1:31889213 15:11 47 0 active#

Wallhacker, blatant - I have a conclusive demo. No admins are online on the twk steam group either. Whoever puts the ban through let me know and I'll upload the demo. Thanks.

yes everyone but problem is :

Internal Server Error

The server encountered an internal error or misconfiguration and was unable to complete your request.

Please contact the server administrator, mailto:

 This e-mail address is being protected from spambots. You need JavaScript enabled to view it

  and inform them of the time the error occurred, and anything you might have done that may have caused the error.

More information about this error may be available in the server error log.

I have tried to add cheater five times but I couldn't

I'll look into the admin for you tonight Roblackpool.

Sorry for absence, but a lot of of people in Twk are very busy at the time being, so sorry for that

I'll make a topic in general chat, so all Wcs Error reports can be put in there

Regards

It might have been a transient error, I will try to add the ban, also check if the demo isn't too big (I think the server accepts till 64Mb I guess).

Sometimes you may experience 500 errors on the apache, as I am changing things on the webserver and sometimes I also break things in the process :)
