I constantly see you post after your own post. Even see you post the same stuff in diffrend departments 😊
Just edit instead.

Indeed de_tides isn't a bad map.

--VooVooVooVooVaaVaaVoomDoo-- awesome map, also would like to see more of the classic maps, i know some people prefer the anticamper and texture stuff but personally i love the classics way more than those, and voodoo youve inspired me to download fruity loops 🍌

ellu more map idea's incomming 🍌

www.gamebanana.com/maps/13899 - Its called de_nightfever its from the guys of d00ds.com the same guys who made the map de_losttemple

www.gamebanana.com/maps/20724 - Its called de_lost2 its a jungle type map there's not much to say about it its big its badass its a must have... 🍌

www.gamebanana.com/maps/30987 - de_losttemple2 its the follow up for the old de_losttemple map and its smexy 🍌
.. also from d00ds.com

www.gamebanana.com/maps/19321 - de_rush also from d00ds.com a really good map settled on a tropical island ive played it and loved it 🍌

www.gamebanana.com/maps/19970 - de_losttemple_pro its the updated version of the de_losttemple i quote, *de_losttemple_pro. The updated LostTemple, de_losttemple_pro, has several major changes that will impact overall game-play of the map: The main tunnel, leading the terrorists to the temple steps, has been altered to allow the terrorists a slightly better approach to middle. Along with this, bombsite B has also been modified. You can now flash/nade/smoke over 99% of the walls in the map. The last bugs are fixed and the file size is compressed by 30%. *

Greetings, Liquid Snake 🍌
