

## Question about aim\_icemap

Posted by Ronzku - 22 Mar 2011 13:24

---

So, like normal people were playing on WCS server and the map was aim\_icemap, and there was 2 people under the map shooting and killing other people. And all others complained about it. So i was wondering is it allowed to be under that map? They got in there with the race "Dragonfly";

some pics...

That is exploiting a Map bug so no they should not be under there.

Didn't know the map had such low walls ( even not visible walls ). This is one of the down sides of wcs mod & normal maps

Nevertheless, it's not allowed...

Thanks for report
