

Map List

Posted by Deathtoll - 15 Jan 2009 13:06

I've been promising to do this for a while now but with 4 economics exams tomorrow theres no time like the present

As everyone knows the Warcraft server is in desperate need of a few new maps as the server literally just rotates crazyjump, scoutzknives and dust2 at the moment, here are just a few suggestions, some of them from the old TMH gungame server

aim_ag_texture2

Aim_deagle

Fy_poolday (might be a bit small)

GG_dipmap

GG_deagle5

GG_fy_icecabin (Fantastic map, i may have spelt it wrong)

gg_spongebob_v3 (dont be put off by the name, its a great map and a good size)

Aim_shotty 🍷

Scoutzknivez_island

Awp_snipertowers

gg_aim_ag_texture_jungle!!!

gg_dm_bloodarena3 (the big open air deserty one)

Ive tried to shorten it to just realistic ones that can fit 20 and are fun to play, not just personal favourites

If the awp maps get put on, can we get them replaced with awp_subzero? Constant awp maps seem to make some people leave.. and they get dull.

As for the others, they sound good. Haven't played spongebob for ages!

yeah i only put one awp map on there because they do get a bit annoying, especially subzero!

cheers for putting some of them up ds, just one thing though.. is it possible to get aim_ag_texture2 or Aim_texture_jungle instead of aim_ag_texture2008, the 2008 version isnt great..

Will have a look tonight 😊

The problem with the GG maps is that the maps need buypoints and generally the GG maps don't have them.

Doing one that has them, but small... yup most GG ones dont have them as its not needed for GG so ppl dont add them. If you guys wish I could get the lego one and add buyzones to it... easy 😊

the deagle maps were always good, especially because the deagle is powerful itself, so races that summon guns arent all powerful, but still give an advantage

yeah theres a load of different versions of the deagle55, theres one called like aim_deagle or something, would that have buypoints?
