Voteban and votekick doesn't work on the Wcs server, if u didn't already now 😊

And why adn when did the hell races become private? :O just unlocked the first one and was quite unhappy:(

Hell races have always been private. They are too crazy and would kill the server if everyone had them.

Really? Pooky played one the other day (hell pride I reckon) and it didn't seem overpowered to me...

Anyway, got a clue about the rock vote/ban?

And however the vote mute is awesome 😊

I think voteban and votekick are disable on all servers to stop people abusing them. Most of the time

there is an admin about anyway.

Ok, then I know 😊

Thanks

One or 2 of the hell races have skills that i can see would put a lot of strain on the server if everyone had them. Others are fairly normal 😊

I do agree that voteban/kick are abused, but rtv is my main problem. I think its a useful tool for when there are no admins on, (which is rather irregular), but when im on the server i have occasionally seen the map change 2 or 3 times in the space of 10 minutes. Thats when it gets ridiculous.

okay^^ tho it takes a hell lot of time to get there, now there's me and five others that have unlocked it ^^

I think rtv is sort of sweet xD when people change race and suddenly a vote pops up and they accidentally press a random number we can fix it by using rtv 😊
