

## lag spikes on CSS WCS server

Posted by Nightmare - 27 Nov 2010 10:51

---

Dear Admins of TWK,

I was playing on your CSS WCS server today and suddently there was a lot of lag on the server. It was very terrible to play. My question is: Could you please try to solve those lag spikes and making the server again playable.

Hello,

It's true, like every minute the ping goes from normal to 100+ to all players.

I don't know how it comes but i'm sure it will be fixed when they all get out of bed.

(atleast i hope so 🤔)

M3ntoz

We saw all the servers are currently down. That's why we think you are already trying to solve the problems. Thanks in advance for resolving the problems

Hi,

Thank you for the info. I believe these should be sorted now. This was an issue with our hosts and an issue that occurred this morning ...

Between the hours of 04:30 - 05:30 this morning, we fitted a new line card to our primary router located London, Docklands. Unfortunately, a hardware fault has arisen requiring the immediate replacement of the faulty line card.

An emergency maintenance window has been scheduled today between 11:00 - 12:30 GMT. During the scheduled window, connectivity will be lost for approximately 5 - 10 mins while the line card is replaced, tested and the IOS reloaded.

We apologize for any inconvenience this may cause; the emergency maintenance is necessary to ensure the smooth operation of our network.

Please note: Due to the faulty line card, packets are currently being software switched by the router instead of in hardware. As a result of this, the router's CPUs are under extreme load which might result in packet loss before the maintenance window.

No problem Waltz

I would like to play only on a non lag server and yes I will send the suggestions etc. to you.
