---

Hi I've been playing on your gungame server and I love it 🙄  
I was wondering if you need an admin for the server?

I have experience as admin on 4 servers, 3 of them were rpgmod the other 1 was zombie mod. I'm on alot. I'm capable of expressing myself in 4 different languages: English, Dutch, French and German. But I tend to make rather many spelling mistakes when typing German and French but people seem to understand me 🙄  
I'm 19 years old, I live in Belgium -> thats why I speak 4 languages.

Steam name: eL\_v.per

STEAM\_0:1:14009484

In game name: eL\_V.Per (was eL\_V.Per - ?@????\$ but doesn't seem to work after css update)

Just tell me, you were wating to get admin and then get lost?

Lol no, I just got bored, I also didn't expect I would stop playing css this fast. Last time I started playing css again it was for 2 - 2,5 month, the times before that it were more months. I dunno, I might start playing again within some days. I'm spending my time atm to download many (thousands probably 🙄) and for my pc. I don't got an other game that I want to play atm so I might play again within some days, just need a break. Hope you understand.

Of course, if you want me to start playing again now you can always DL the songs for me and send them to my email 🙄

I think there is a good chance that I'll come back the day after tomorrow to knife you some more, Tunes. I don't know yet how much I'll be on then but we will see. If I quit completely I'll warn you in advantage.

Being admin is something that rather keeps me at a server instead of making me leave.

I love being admin because it's usefull when there is a cheater or somebody shouting at the radio etc.  
On other servers these things can be very annoying.

Instead of quitting for months at a time, why don't you play in small amounts. Play a couple of hours a day and then you don't get as bored, rather than playing all day 😊

Well I'll probably play less in the future 😊
