

FF on old WCS server

Posted by FadeToBlack - 06 Jul 2010 14:29

This now seems to be a regular Source server with FF on and nothing to prevent constant TK. Any way to add a mod to kick player that constantly TK or just turn FF off?

Flex your admin muscles.

Warn players that tk'ing wont be tolerated, if they carry on kick them. If they rejoin and still tk then give them a temp ban.

I don't have admin power, except some voting stuff.

I've altered to FF off atm.

There's a blog entry on front page of site with some info on what is happening atm.

So is the wcs server uprunning? checked in yesterday and i couldn't find it... Problems with update? 😊

/ Long time no see, been playing alot of Cod aka modernwarware 2 😊
