

## **FF on old WCS server**

Posted by FadeToBlack - 06 Jul 2010 14:29

---

This now seems to be a regular Source server with FF on and nothing to prevent constant TK. Any way to add a mod to kick player that constantly TK or just turn FF off?

lol

it just gets a little frustrating. i think every single warcraft player has asked at least one of the admins about whats going on with the server.

---

you should read the article's on the front page of the site, will give you updates on the servers and other things from the community.
