

## Server Killers

---

Hai

Theres a few maps on the gungame server which are pretty much server killers where when they come on, pretty much all people leave and it ruins the game, any chance of them being removed from the server rotation?

They're the dark one with music, and the massive orange 1. (I'll find out the names of them but other players might know them already)

Cheers. 🍷

I belive the massive orange one is gg\_zomg\_texture or something to that effect, and the dark music one is truly awful but i seem to not stop myself getting into a rhyme with the music :S

Cheers for the feedback mate, will remove them from both GG's.

Can you list some you would like to see too?

🍷
