

Submit a ban. (failed, maybe?)

Posted by uhm - 04 Feb 2011 08:46

I went to submit a ban, but I wasn't sure if it went through or not. I got a 500 error at first, then nothing. So I'll just re-post here just incase.

Players SteamID: STEAM_0:0:37796995

Players Nick Name: Vampire

Description: Seemed to be blatantly "wall hacking"; knowing where people are without any hint (footsteps, visual conformation, sounds) of where they might be. When I said he would be banned in-game I was just trying to get him to leave, obviously it is up to your review.

Demo: www.sendspace.com/file/tcmss1

Edit: Typo

Players SteamID: STEAM_0:0:19914744

Players Nick Name: coco

Description: Aimbot, wall hack, no recoil. The demo quite clearly speaks for itself.

Both the demos were fairly obvious, bans added.

Thanks for taking the demos (:

Add me to steam (roboindahouse), if you see a hacker again and I'm online give me a shout and i should be able to come on.
