I think this race is overpowered. i was playing against someone who had it and they had over 350 health!! can this get fixed. The race is Priest

you can buy 200hp if u want by 2 times periapt of health (+50) and once the item that gives +100 for a round. If his race has 150 basic health, that's what u get.

im pretty sure he didn't buy it and i would waste my money on health power ups when i could just sped it on xp instead lol i just think that having over 300 health midway through a round (without buying it) isn't right

Well, he starts with 150hp and he got lifesteal so if he kills alot without taking much dmg, he gains alot of hp.
