

No Block

Posted by kl3sh - 14 Feb 2011 00:11

Is it possible to get no block installed on the wcs server? It's annoying on small maps where people just block you, causing you to die, like on Anit-Camper :/ Just wondering...

Thanks 😊

ye, its very annoying when this happens, and also on some maps (if example full server) like awp_float ppl attend to spawn on the same place and get stuck, kinda sucks to be those two guys ;/

no block would make it alot easier, especially when the servers packed 😊

This issue has been raised before and i dont think noblock is appropriate. On top of other things, it makes it extremely hard for knife fights which on a server which has players often using just a knife isnt very good.

It would be nice to have noblock, because every people are complaining about it. But yeah i agree that in knife fights it would be difficult...so i am neutral:D

But i think that noblock would be better that block:)

Wondering if theres away of doing "half" block - meaning it only unblocks you from your team mates

Or even just the first 2-3 seconds of a round would solve the issue of players spawning in one another

But generally I still dislike no block. Also the more mods we have the higher the server load = lag potential increased 🙄

Ok a quick google found me this :

forums.alliedmods.net/showthread.php?t=148599&page=2

However its got a few issues 🙄
so maybe my second idea if we end up going with some noblock is the way to go atm

instead of noblock, couldnt there be a command to get unstuck? like !stuck, and then u will be teleported to another place in spawn?

Actually from reading your comments, what about a feature like on zombie mod, where you type !block and for 5 seconds you are in no block mode? :/ And mix that in with Half block where no team mares are blocked, and wins? 🤔

EDIT: You could have it no block for the freeze time at the start, or for first 10 seconds of the round, to prevent any spawning on each other? 🤔

Another one here

forums.alliedmods.net/showthread.php?p=820069

with usable command : sm_noblock_blockafterspawn_time

Think this one should fit the profile.

Will test it, when i got some time
