

Kinda RAGING!

Posted by VooDoo - 14 Apr 2011 16:17

Sorry to rage but im in a major bad mood with TWo hATS, not mentioning any names GAWIORGAWIOR1, being a big asshole-noob abusing his skills as one of those monks that switches place with you, he just flys through the sky, when you shoot him you fall to your death, there is no way to counteract it because its an ability not an ultimate, he took out 11 players using this because if you shoot him you fall to your death and die, we asked him politely to stop and he just replied with "why should i", in my opinion an attitude like that is "ASSHOLE-ISH";....

So my request is either to give people like him a Warning.. or to NEUF that race so you cant be an absolute nutjob with it...

Thankyou (sorry for the rage but i feel it is neccesary)

To be honest he's allowed to use zen monk and we can't tell him not to since it's part of the wcs. You can always ask him to change but you can't force him. I have my problems with zen monk to. The swapping and paralyze drives me nuts but you just have to live with it I guess.

Maybe some hints/tricks to kill the race easier or avoid swapping. Always asking nicely and hoping the change is an option to try to. 😏

We can't really stop users, using Zen Monk, but we CAN ask them politely to stop just "sky-camping" as it isn't fair.

I don't see a problem adding it to the rules, "don't sky-camp for more than 2 rounds consecutively"...

how does that sound Mentoz/Pooky?

VooDoo: Thanks for letting us know, but in future reference can you make topics like this in the community forum so only community members can see it ^^

Sounds good to me 😊
but I don't think it will such a big difference.

It sounds good and helpfull but still if they want they can sky-camp 2 rounds and 1 not, then back 2 rounds. It's less but kinda comes to the same thing.

But It would be better then nothing though 😊

--VooDoo--

not really abusing the skill as it is automatic and doesnt always happen, and you can actually counter it with picking a race with low gravity/race that can fly.

and not really sky-camping when u said that he is flying through the sky, more like walking on the ground, just in this case, he is flying

jup,

but it's kinda unnoying when in ag_rats , a zen monk is flying in the middle of the map,

and when you shoot him you fall down to death.. 🤔

that's the thing i hate on zen monk 🤔

Death on updates!

Tbh, you can just stop shooting him while flying, he'll have to come down at some point :b

If he is the last person, then you could just discoball him down 🤔

another thing i really hope disco ball will be removed once 🤔

it's always me who they teleport :s
