

Hey guys, hope you will have a look into my app.

Posted by |FP| Callum - 08 Jun 2011 14:45

hello everybody, just wanted to take a moment of your time to look at this quick video

this is a video of a hacker that was on twkWCS earlier today, I was really getting wound up at the fact that I could not do anything about it being just a TWK member, I would not want full admin like WCS admin and things like that, just basic admin with ban/mute/kick to keep the server from getting players like fapO using aimbot and getting everybody to leave the server or getting it down to a low number of 5 players or so.

Thanks for looking into this guys and hope you get back to me soon

agreed, or just slap will do 🤔
don't think they want everyone having admin powers because they might get abused or we could ban innocent players just because they've got skillz that killz. But slapping them to 1hp a few times might slow them down enough for an admin to come on

mentoz i just ment like, you dont have to give me full admin powers just the basic things such as slap, like iam said 🤔
kick/temp ban and like mute, not wcs admin.

with ban and kick, u can remove them from the server by force, but with sounds u can annoy them to DEATH eg deadness, id say sounds has the upper hand there 🤔
