

VooDoo's admin application :O

Posted by VooDoo - 13 Jun 2011 21:56

Hello guys, VooDoo here.

I am making this post as an application to become an administrator on the Warcraft Source server.

I play around 2 hours a day or more on the WCS server alone, i have had alot of past exerieence of being admin as i have owned 4 servers myself, been admin on 2 and been co-owner of 1.

I would like to be admin because although the current admins are good at doing what they are supposed to, and i think there is enough admins, i feel that the administration team are not active as much as they should be. I am always happy to help people, i give advice, teach and try to be as friendly as possible.

I see my faults and try to correct them, i have been told by 1 or 2 of the users that i talk on the microphone too much, so i have cutdown the amount that i talk on the microphone, i was also told by "Mr.Moo" that i can get over angry about things at times, i have also worked to cut down the ammount that i rage, i feel that alot of the players on the server know me and i am friendly with, i have other skills under my belt such as VB.net programming, low level web design, and i am not-too bad at graphics design, i also enjoy making maps, skins and sprays for counterstrike source.

I love the TWK community as they are so friendly and kind, i know there has been a few admin applications recently so i dont know how successfull my application will be, but its worth a try to become more than just a member in this great community.

I hope that some time, i dont know when, i could become part of the administrative team and i hope that you guys will consider my application.

Thankyou

--VooDoo--

dont know if my opinion matters much on admin requests coz its up to the big dogs 🤔
, but personally i think another admin would be great to have on the wcs server, as voodoo said you
guys are the shizz 🤔
! but the server would benefit alot from a new and active admin on board, an id say voodoo fits the bill 🤔
: gd luck

Hey guys, I was just wondering where this application stands at the moment?

Not to seem ignorant or eager, I am just unsure on what is happening, whether its gone forgotten? or still in decision, I guess this is a kind of bump.

I understand the administrators have lives of their own and may be busy.

Thanks
