In my opinion that would be a bit boring 😊
With sniper maps you can at least go the sniper and the knife but just a knife would just be easy kills for people with knife races

no sniper/scout or knife maps on the server would be beast imo and deagle should also be removed + new maps added getting real sick of deagle tbh but i think about 95% of the community is getting sick of it 🤔

Not only what the above people said, but new people that aren't high enough to use the knife specialized races will get their ass handed to them in a tin.
