Hi Risky Pwnz 😊

At the moment we do not recruit full admins directly from outside the community.

Players should first join the community and wear our tag. This will give you community member rights on ours servers.

After a period time as a community member, depending on how you have behaved on the server and website, then we will review the application for admin on the WCS server.

We will add you to the community member list for our servers and also for the site.

We have community rules which we expect everyone to adhere to. The are common sense tbh. You will

find these rules in the private community members only section of the forums and if you stick to these it will make it more likely that you will get some additional admin rights on the WCS server in the future.
