

## Watcher status

Hello my name is Demoniac.

I am quite regular on the WCS server and I've experience quite alot of negative influences in my time on the server. I know I am not known by quite alot of twk for I have not seen much members so it will be in my deepest gratitude that you will accept my request of being a watcher.

My target of being a watcher is to reduce the amount of immaturity and other bad behaviour within the server to have a friendly gaming environment which people can enjoy the game in.

I think I qualify as an admin because I'm online once a day, I have huge amounts of knowledge about rules, bugs, glitches and exploits, and I am a mature player whos ambition as a watcher is to reduce bad activity because I am sick of people ruining the game for the majority of people who just want to play for fun.

Thank you for reading this, because I know quite alot of the time I am on there aren't any admins around while bad behaviour is carried out.

Hope you accept the request.

/Demoniac

I agree with risky, the watcher should also be able to mute and , maybe, change map.
