Clearly aimbotting on the WCS mod server. Here is a demo of him. Check console for his ID when playing.

Thank you for taking the time to demo and join our site to report.

Just FYI in the future you can also use our SourceBans website to submit bans and demos - the advantage of which is we immediately get notification so we can check them out and act quickly 😊
Click link on menu bar at top or go here...

www.twkgaming.com/SourceBans" onclick="window.open(this.href);return false;

On reviewing the demo it appears he was using an aimbot and has been banned from all TWK servers.

Ok thanks for banning. I'll use that in the future if there are any more cheaters.

Great work with the server, it's really enjoyable. Thanks. 😊
