Could someone add this to the skill surf server? It's a great map, thanks!

Hello admins ^^

Lee.H just met me a few days ago for the frist time and i'm showing him some maps on my server that are cool to have on your server aswel.

The diffrence between my server and yours thats mine is 66tick and urs 100tick.

66tick surfing is harder.

☺

When Vogon is back.. I wanted to do a new map list for us as I will have to edit many maps so that our new surf timer won't be bugged 😊

Would be a great help if you could write your favorite maps tho, because I want the whole maplist finished and tested before I do the work and integrate them in the plugin ;) so keep on posting maps you want to keep or maps you want to have uploaded!

krow10 is linear, so it will be rtved too fast, coz many beginners lack patience...

here is the map list again: pastebin.com/41xn2NPh onclick=">window.open(this.href);return false;

deleted some other linear maps tho 😊
