

GG noblock

Posted by Che ken - 01 Aug 2010 17:51

As with the surf servers, I want to propose we have noblock on the gg server. As I've begun to play a bit more recently, I've found that most rounds on some of the smaller maps, I am trying to go somewhere but am blocked either by teammates who can do nothing but camp, or players that are trying to go the other way (like two people trying to get through a shop door, one leaving one entering and both stepping to the same side to let the other past) by which time an enemy has appeared and either shot you in the head or knifed you in the back... I've seen plenty of gg servers with this (I think we even had it at one stage) and it works nicely, stops players from blocking each other to death when trying to be 'stealthy' and allows for an effectively better gameplay imo.

Just thought I'd get everyone elses opinion on this, see what the other gungamers think 😊

Naaaaaaaaaaaaa, you can't play properly with noblock on especially when it comes to knifing

Regular GG is block on for me too, its one of the variables included in the gameplay. I too get sometimes pissed at noob blockers, but like vapour says knifing sucks with noblock on and its a fun part of the game.

For our GG Deathmatch one no block must be on, otherwise it would be a nightmare.... 😊

GG = noblock off

TDGG = noblock on (or else I would spend my time slaying campers) 😊
