

Public twk group joining.

Posted by M3ntoz - 30 Jan 2011 12:08

Hello,

I recently played on a server where they had the command !join like motd and the public group of those server popped up like motd and u could click join. I was wondering if there was a way to get this on the twk servers also. People in group maybe come back faster or so and if people check pages it's publicity.
