

## wcs in-game betting :D

I remember on old wsc there was a betting system that allowed people to bet on a team (T or CT) and gain money if they won. i liked this feature and do notice some people trying this feature in-game. Is there any way to get this back?

befor the OB update it was very easy to level as you could by tombs of leveling which where 16k which made betting very overpowered when its easy to predict whos going to win. Also leveling is all part of the fun. No fun if your all the best race ever now is it 😊

I got all races unlocked and i still suck 😊

lol you will always beat me 😊
