defusal game

Posted by Grim4118 - 13 Feb 2011 11:56

_____

i remember a sort of minigame that was on the server (may have been before the OB update) It basically was something you could do when a T was setting up a bomb at a bombsite. when setting it , the T could choose a colour wire which if the ct pulled would automatically defuse the bomb. Could this feature come back?

_____

Really disliked that feature :/ If someone randomly pressed a colour, or you had some idiot on the team, they'd just keep pressing a random colour, when you could have won the game

_____

its a bit of fun and you don't have to press a colour

_____

I liked the feature with pulling the wire because there was fun if CT would pull the wrong wire
