vicske1 or i thought that was his name made a race suggestion.. a race that spawns zombies/headcrabs or something like that i thought its a cool idea but i don't know if it'll be very hard to do or even possible but i just liked the idea so i thought i'd make a topic about it 🤔

not if he can only like summon 1 thing and its a melee only thing that is a bit slower than players. and the summoner doesnt have much health or nothing special.

I said zombie skins and headcrabs are already used in some races. You should stop posting things about things that i said when they arent correct.
