Hummm, yes, maybe it the ip for the website, what are you threatening about??

Looks like it is a very complex piece of information you got there, I always try to hide the website ip, but get hard when it is really needed to be public, soooo you and a few gazillions KNOWS what is that ip for. Cool stuff heh

So, you want to sql inject, nice, go ahead and make my day.

Every CS:S server admin on this community knows quite well what is cmdrate, and valve fixed it at 66, so not really use you setup a different value, and if you do, you'll get banned on all CS:S servers you find around. So have fun with it.

Banned for life, and for my point of view, YOU started to threaten people.
