

Surf Eclipse

Posted by Che ken - 29 Jun 2009 22:34

I play on the surf server every day now (the gg is always empty so I can't go on it, even though all the maps look really cool 😊) and I know of only **one** person who can do this map, and even he has difficulty with it... All people end up doing is camping just in front of spawn or camping in jail, which only takes about 5 secs to head to even if you are a good surfer. Think it should be removed, will look into other maps that could replace it and will post them here when I find some good ones

Have replaced with surf_rebel_resistance_final3 for now.

Thanks for the info - this is exactly what we need to help improve our servers 😊

All depends on who is playing and what mao it is mate 🤔

If the other guys camp, so will I. If it's legends, jail2 all the way 🤔
