

gungame.

Posted by eskimo - 30 Aug 2009 12:56

i find the gungame server to be thoroughly enjoyable but one thing that pisses me off is the no block. You go to knife some1 and they just run through you. Also your in a tight bottle-neck and the opponents just rush through you making you. I think it would make the server better without it on. Only my own thoughts thoguh tbh, some people might liek it on.

Thanks for the post.

I personally prefer it off to, and I know some more do, enabled to avoid excessive blockage, but I think you're right.

We will turn off again.

Well, I tend to refer to it as a noob server option, but I was getting used to it, avoids me having a heart attack or pressing the admin button and slay the noob blocker (I wish I had this extra in my car "Noob blocker removal button") Yesterday had a word with vagon on this, sincerely, its a two way option, I like it either on and off.

Anyway,I asked to turn off noblock.
