---

ermm some1 appears to be buying ak-47's and m4's at the start of the round, continuously. I think he was buying it through console. I was wondering if we could turn this off if it is the problem ? Also seeming as i can only speak admin but cannot access the admin panel i can only give empty threats without a punishment. So if you could look into it more and see if he was buying through console by using binds or whatever. If it is the case can you find some sort of solution like restricting all weapons other than pistols.

Will look into weapon restrictions to try and stop the buying.

btw...

Your sig code should be this maybe?? 🤔

Weapons other than pistols should now be restricted by default 🤔
