

Wards damage

Posted by FadeToBlack - 23 Dec 2009 12:43

Wards are imo by far the cheapest way to kill someone and are especially annoying on small maps.

Would it be possible to change the code a bit so wards don't do damage and just slow? Removing the slowing part or lowering the damage part could also work or put a cooldown on it so you can't drop 3 at once.

I don't see a reason to change wards. They are very easily seen and can be avoided. If you are in a position where you don't have a route to take without being warded, then that is against the rules and should not be occurring.

Im with Vapour on this one, as annoying as they are, there isn't much need to change them.
