PlayerTraces for TWK- Surf deathmatch server

Posted by Pooky - 13 Jan 2010 07:15

_____

Hi all

As the wcs server is starting to gain more players, i started to wonder if I could help with other server than just the Wcs one and came up with a lil idea

Surf death match, right, we can add player traces (colorful beams which appear behind the players while they surf). I used to surf a lot and when i found a server which had this kind of graphics I was sold.

In my opinion It's a easy & fun way to up the servers potential.

I found a simple script for mattie event scripts

28tydb5k

But i have no doubt that there might be better versions out there

This is just an idea, hate it or like it, but I'd say, try it out !

Regards

Like the idea of this plugin, but for the moment, the surf-deathmatch server is a very busy and popular server so I'd be inclined to not meddle too much with it atm.

Perhaps a skill surf server with this mod on might be an idea?

The server is doing fine yeah 😊

Just wanted tp share the idea, might come in handy some day !

ps : like the idea of a skill surf, but how many servers can this dedi computer take lol ?
