

Autobalance...

Posted by xepha - 12 Apr 2010 00:14

Hi,

I've literally just seen your BFBC2 server deserted after the apparent autobalance failed to do anything about the unbalanced teams.

It was really quite pathetic to see a stacked team spamming the spawn points, with player after player leaving the server.

Only moments before, the server was full. Then after a round had ended, a group of players on the losing side obviously left. The next game was a catastrophe.

Since the in-game chat is essentially disabled (can't chat while dead - hideous language filter) I just wanted to vent here.

Other than that, great server...

(It is actually in my favourites).

Yours frustratedly,

Xepha

☺

I know autobalance works. I was driving a buggy when I got the warning message of autobalance, then 2 secs later I was dead with the text "EPIC FAIL" and it claimed I committed suicide. When I spawned I was on the other team..I even got the reduction in score for my suicide 🤔
