I think I have the Geforce 5870, which runs smoothly. However, should upgrade from dual to quadcore processor... But it works fine, only thing that is bugging me is that party join (/CO-OP) isn't working, Don't get the pop-up to join or start 🙄
Working on fixing that, but the EA Helpdesk are pricks 🙄

My IGN is demonic_swe, join the platoon TWK Gaming to join in the fun! 🙄

PS. As of now, how many here joined the platoon? some ppl joined which I didn't recognise... 🙄

as soon as I get party join to work (yes, still not working for me and no help from EA...) I'd be happy to arrange a game for all of TWK's players + friends of theirs 🤔
