I herd the match making is better but the comunity is worst for now as DICE wants people to hack and get them IP banned so that ruins the gameplay as there sometimes hackers on the game.

Though i dont understand why should you hack in a game that you paid 50\$ for...

I would re-buy BF3 for PC if it wasn't for Origin and their shitty approach to joining games. I'll stick with 360 Battlefield 🤔

Tbf Origin doesn't make a difference to the game, ye you have to get games by going onto a website, but does it really matter? At least it lets you play the game 🙄

Yeah, but I think it's a ridiculous design decision in the first place, but the fact that you have to completely leave the game to join a new server is just the icing on the shit cake xD

technically, it's not origin causing the problems, it's battlelog thats dependant on a browser, origin just lets you launch battlelog really, problems from there are related to battlelog 🤔
